

Disinfectants, Cleaners & Cleanroom Solutions

A specialized portfolio of sterile cleaners, disinfectants, sporicides, PPE, and surface-treatment products designed for compounding pharmacies, cleanrooms, healthcare facilities, and other critical environments.

DECON-SPORE 200[®] Plus

Sterile peracetic acid and hydrogen peroxide solution supplied in the SimpleMix[®] system for use as a cleaner, disinfectant, virucide, fungicide, sterilant, and sporicide for hard, non-porous surfaces.

Protect 800[™] Chemo Gown (Sterile)

A sterile, low-linting, impervious gown for compounding chemotherapy and hazardous drugs in the cleanroom. Made from breathable polyethylene-coated polypropylene material.

Pharma-D Surface Disinfectant[™]

An EPA-registered quaternary ammonium disinfectant designed to remove surface contaminants and disinfect hard, non-porous surfaces.

STERI-PEROX[®] 6%

Sterile, ready-to-use 6% hydrogen peroxide solution formulated with USP Water for Injection for use in cleanrooms and controlled areas. STERI-PEROX 6% is an EPA-registered cleaner, sterilant, and sporicide designed for hard, non-porous environmental surfaces.

Pharma-Hol[™]

Sterile 70% IPA / 30% USP WFI cleaner for gloved hands, vials, equipment, supplies, and cleanroom surfaces.

Sterile Cleanroom Coverall

Sterile, breathable cleanroom coverall designed for hazardous-drug handling, with low-linting fabric and tape-reinforced impervious seams. ASTM F3267-22 tested.

Pharma-Surface Guard[™]

Two-step wipe system for cleaning, deactivating, and decontaminating chemotherapy and hazardous-drug residues on work surfaces, with a neutralizing second step designed to help protect stainless steel.

Pharma-Frock[™]

This low-linting frock is made from premium-coated, non-woven polypropylene, supporting a contamination-free cleanroom.

Designed to support everyday cleaning routines and higher-level contamination-control protocols, these products help maintain clean, compliant, and efficient workspaces.
