

SPHERGO POP® TUCK N' GO™ SURFACE CLEANING TOOLS

Companion Cleaning Tools to the SPHERGO® Flat Surface Cleaning System

SPHERGO POP® tools offer no-touch disposal of soiled cleaning pads. No-touch disposal minimizes cross contamination and transmission of pathogens and germs from soiled pads to clean surfaces or other persons.

SPHERGO POP® cleaning tools can be used with the SPHERGO® extended reach pole or the telescoping pole to eliminate awkward bending and help clean those hard to reach places - sold separately.

Infection Control
SPHERGO POP® tools offer no-touch disposal of soiled cleaning pads

SPHERGO POP® TUCK n' GO™

Designed for use with almost any disposable wiper or reusable wiper for your specific cleaning tasks while eliminating the need to touch the soiled wiper after use. When you are finished cleaning, simply press the trigger and "pop" off the wiper over the refuse container. The "pop" eliminates touching the dirty wiper and the "poof" or cloud of dust and debris associated with other popular cleaning tools.

Perfect for use with our new SPHERGO POP® Tuck N' Go™ Mopping system, our Pharma-Sat Plus™ pre-saturated and Pharma-Wipe™ dry wipers can be used throughout your cleanroom for cleaning, disinfecting, spill control and wipe down of products. Both our pre-saturated and dry wipers are low endotoxin, ISO Class 5, non-woven and made with 45% polyester / 55% cellulose.

SPHERGO POP® TUCK n' GO™ Surface Cleaning Tools

- Cleaning tool designed for use with almost any disposable wiper
- Allows you to remove the soiled wipers without touching them
- Accommodates most disposable or reusable wipers; designed for use with 9"x11" wipers, but will fit any wiper that can be folded to size

How To Use TUCK n' GO™ Surface Cleaning Tool:

1. Press triggers to open plates.
2. Place tool on top of cleaning cloth. Tuck ends between the plates.
3. Press down until you hear a "click." Start cleaning!
4. When cleaning is complete, do not touch the soiled cloth. To remove, hold over refuse container. Press the triggers to reopen plates. Allow soiled cloth to slide off tool and into garbage receptacle.
