

SUPER STICKY SHOE COVERS

SC-SS

DESCRIPTION

Super sticky shoe covers are designed for use in work spaces with slippery conditions. The disposable apparel has a non-skid sole which provides more traction on smooth floors. Moreover, the sticky bottom will prevent sliding on super clean floors. These shoe covers are fabricated by combining polypropylene with a coating of polyethylene. Therefore, the products are quite resilient and resistant to damage. In addition, the fabric provides protection against pollutant particles and general liquids. It is also important to note that the shoe covers are breathable, comfortable and nonallergenic.

GENERAL INFORMATION

Size(s)	L - XL
