

# GARBBING FOR USP 797

\*Garb must be donned and doffed in an order that reduces the risk of contamination determined by the SOP of your facility\*

## When Compounding Category 1 & 2 CSPs our recommendation is the following:

Pharma-Coats: disposable, cleanroom, lab coat that are low-linting, non-woven, spun bonded Polypropylene.

**Item Numbers: Please see the following page for a chart of sizes and configurations.**

Pharma-Gloves: an ambidextrous glove that is latex-free, powder free, has a 12" cuff, validated sterile, individually packaged, and with paperless packaging.

**Item Number: Please see the following page for a chart of sizes and configurations.**

Pharma-Shoe Covers: an anti-skid sole shoe cover, which is disposable, breathable, and light weight. Made up of non-shedding, non-woven, latex free, and spunbonded polypropylene.

Pharma-Bouffant Caps: designed to cover your hair to prevent hair shedding during compounding. Made of light weight polypropylene, Pharma-Brand™ bouffant caps are essential to meeting USP <797> compliance.

**Item Numbers: Please see the following page for a chart of sizes and configurations.**

## When Compounding Category 3 CSPs our recommendation is the following:

*\*Additional garbing requirements must be continuously met in the buffer room where Category 3 CSPs are prepared for all personnel (regardless of whether Category 3 CSPs are compounded on a given day)\**

- No exposed skin in the buffer room (i.e., face and neck must be covered) – All low-lint outer garb must be sterile, including the use of sterile sleeves over gauntlet sleeves when a RABS is used
- Disposable garbing items must not be reused, and laundered garb must not be reused without being laundered and re-sterilized with a validated cycle
- Facility SOPs must describe disinfection procedures for reusing goggles, respirators, and other reusable equipment

# GARBING FOR USP 797

## Sterile Garments

TCBA40ST: sterile SMS, 40gsm weight, white, anti-static treated cleanroom gowns are designed for non-hazardous drug compounding. The gowns are low linting and latex-free. They feature a stand-up collar, elastic cuffs and thumb loops. Sizes S-3XL

## GammaGuard CE Sterile Apparel

All GammaGuard CE® garments are individually packaged and sterilized to a 10<sup>-6</sup> sterility assurance level (SAL). This helps prevent workplace contamination and cross contamination of products or materials. Low-linting fabric helps reduce the release of unwanted particulates, while tunnelized elastic also contains particle shed.

Sterile Frocks	
CE11026CIS-S	GammaGuard® CE, Frock, Tunnelized Elastic Wrist, Serged Seam, Sterilized to 10 <sup>-6</sup> , Individually Packaged 50/cs
